The Permanent Mission of Niger to the UN in New York is pleased to invite you to a side event on:

**Women's access to sanitation and hygiene in the informal sector**

20th March 2017, 8h15 to 9h30 am
Room VII at New York United Nations Headquarters

Chaired by
Mr Barmou Salifou, Minister of Water and Sanitation of Niger

The side event seeks to present findings on the challenges women face in accessing facilities for sanitation and menstrual hygiene when working in the informal sector. It will provide a space for women to highlight their experiences and to bring their voices to the table. Based on that, the side event seeks to identify solutions for the way forward. Above all, any measures to bring about change must be based on the participation of women working in the informal sector.
