E-Government for Women’s Empowerment in Asia and the Pacific

Closing gaps, maximizing opportunities:

Harnessing E-Government for Women’s Empowerment

ICT and E-Government can ensure women’s empowerment

egov4women.unescapsdd.org
The 2030 Agenda for Sustainable Development adopted by UN Member States in 2015 affirms that “the spread of information and communication technology and global interconnectedness has great potential to accelerate human progress, to bridge the digital divide and to develop knowledge societies”.

Women’s empowerment through E-Government can accelerate the achievement of Goals and Targets across the 2030 Agenda. The new EGov4Women Online Toolkit directly contributes to Sustainable Development Goals 5, 9, 10 and 16 and is aligned with the CSW review theme on “information and communication technologies and their impact on and use as an instrument for the advancement and empowerment of women”.

The Side Event entitled “E-Government for Women’s Empowerment in Asia and the Pacific” will launch the EGov4Women Toolkit (http://egov4women.unescapsdd.org). This online platform is an innovative public resource related to the design and implementation of gender-responsive E-Government institutional ecosystems in the Asia-Pacific region.

The toolkit represents the first region-wide toolbox to support the gender-mainstreaming of E-Government. Through a set of 5 comprehensive modules, it provides key pointers for policymakers on gender-responsive design of e-service delivery, e-participation and connectivity initiatives, and introduces a capabilities-based approach to outcome evaluation of E-Government for women’s empowerment.

This Side Event is organized by the Economic and Social Commission for Asia and the Pacific (ESCAP) and the United Nations Department of Economic and Social Affairs (UN DESA), Division for Public Administration and Development Management (DPADM) through its Project Office on Governance (UNPOG) in collaboration with the Permanent Mission of the Republic of Korea to the UN.

The Economic and Social Commission for Asia and the Pacific (ESCAP) serves as the United Nations’ regional hub promoting cooperation among countries to achieve inclusive and sustainable development. The largest regional intergovernmental platform with 53 member states and 9 associate members, ESCAP has emerged as a strong regional think-tank offering countries sound analytical products that shed insight into the evolving economic, social and environmental dynamics of the region.

The United Nations Department of Economic and Social Affairs (UN DESA) promotes and supports international cooperation in the pursuit of sustainable development for all. It addresses a range of cross-cutting issues that affect peoples’ lives and livelihoods, especially the most vulnerable. In providing a broad range of analytical products, policy advice and technical assistance, UN DESA effectively translates global commitments in the economic, social and environmental spheres into national policies and actions and plays a key role in monitoring progress towards the 17 Sustainable Development Goals.

The Government of the Republic of Korea has provided financial support for this initiative through the Korea-ESCAP Cooperation Fund (KECF).
