FACTS

- At least half of the world’s populations still do not have full coverage of essential health services
- About 100 million people are still being pushed into “extreme poverty” because they have to pay for health care
- Globally, it is estimated that more than 40% of all pregnant women were not receiving early antenatal care in 2013
- About one third (35%) of women experienced either physical and/or sexual intimate partner violence or nonpartner sexual violence at some point in their life
