# The SDG Accord

## The University and College Sector's Collective Response to the Sustainable Development Goals

**The purpose of the SDG Accord is twofold:**

First it is to inspire, celebrate and advance the critical role that education has in delivering the [Sustainable Development Goals \(SDGs\)](#) and the value it brings to governments, business and wider society.

Secondly, the Accord is a commitment learning institutions are making to one another to do more to deliver the goals, to annually report on each signatory's progress, and to do so in ways which share the learning with each other both nationally and internationally. An objective is that sector SDG reporting metrics will be presented at the annual UN High Level Political Forum.

## The SDG Accord

Recognising that we are at different stages in our journey towards a sustainable future, with differing strategic priorities dependant on our strategic ambitions, areas of expertise and organisational culture

### **This Accord calls upon we, the world's universities and colleges**

to embed the Sustainable Development Goals into our education, research, leadership, operations, administration and engagement activities.

### **We Accord Signatories recognise:**

- The indivisible and interconnected nature of the universal set of Goals – People, Prosperity, Planet, Partnership, Peace
- That, as educators, we have a responsibility to play a central and transformational role in attaining the Sustainable Development Goals by 2030

### **And we thereby assert:**

That as leaders or individual practitioners, academics, students or researchers, we will:

- Align all major efforts with the Sustainable Development Goals, targets and indicators, including through our education, research, leadership, operational and engagement activities;
- Aim to involve members from all key stakeholder groups in this endeavour, including students, academics, professional staff, local communities and other external stakeholders;
- Collaborate across cities, regions, countries and continents with other signatory institutions as part of a collective international response;
- Using our own unique ways, inform, share our learning and account to both local and global communities our progress toward the Sustainable Development Goals;
- Annually report on 'how does my institution contribute to the Goals and what more can we do'.
