- Natural and Agricultural Sciences
- Theology and Religion

Studies Programmes :

B.Sc (Bachelor of Science in Business Administration)

A degree in Business administration is a well-established and very popular course that is suitable for any ambitious person that wishes to engage in the business sector. The degree provides the student with valuable knowledge of business processes and the ability to identify risks, challenges and opportunities in the business world. The student among others will develop leadership and organization skills that are valuable in order to communicate vision while at the same time promoting innovation and change.

This degree is ideal for people wishing to enhance their position within their organizations and for people wishing to start their own business. At the same time it offers excellent prospects for future employment.

By enrolling on the BA Business Administration degree program, our students have the option to transfer, in their fourth and final year, to the BA (Honours) Business Studies (Top-up) degree of the ASIAN UNIVERSITY INTERNATIONAL (UIC), and graduate with a UIC degree.

The UIC top-up degree program provides a broad-based business education, preparing graduates for employment in a range of organizations. It can also serve as preparation for professional and post-graduate study. During this one-year, 'top-up' program, students examine core aspects of business, such as strategy and communication, while investigating specific business problems as real life scenarios.

For more information please visit <https://uic.uapcu.org> or speak to your student adviser.

Delivery Mode: Online and through Supported Open Learning Entry Requirements:

1. Regular admission to a Bachelor's degree program requires the High School Leaving Certificate or equivalent.
2. Applicants with a Diploma or Advanced Diploma may be considered for entry.
3. Applicants with a Diploma or Advanced Diploma in a relevant area may be considered for credit transfer.
4. Applicants who do not meet the minimum academic requirements but who have at least 2 years relevant post secondary professional experience may be considered for entry
5. English proficiency.
6. Copy of passport or ID

Applicants that do not meet the minimum entry requirements may be considered for the 'BASIC PROGRAM'.

In addition to a strong academic record, the student's extra curricular involvement, leadership skills and other relevant background information are taken into account.

PhD – Doctor of Philosophy

The goal of the PhD program is to prepare the next generation of leading researchers.

The PhD is a program of independent, self-directed academic research degree, supported by a team of supervisors that makes an original contribution to knowledge written up in a publishable dissertation. The PhD program also supports the development of research and generic skills to equip you to operate successfully as a professional researcher in any setting. The essential requirement of a PhD is the creation of new knowledge. Being a researcher means developing new ideas and improving understanding through the creation of new knowledge. Your research will inevitably build to some degree on the work and ideas of others, but as a research student you are expected to make an original contribution to knowledge in your discipline.

Each PhD student must take a number of online modules and also complete a dissertation. Students must defend their dissertation in a “viva voce” (oral) examination. The viva voce examination is an intense and challenging experience, but we offer workshops and mock examinations to help our research students prepare and almost all research students who reach this stage go on to successfully complete their degree.

Course Title	Credits
Quantitative and Qualitative Research Methods	30
Leadership	30
Introduction to Dissertation	60
Dissertation (Part 1)	15
Dissertation (Part 2)	15
Dissertation (Part 3)	15
Dissertation (Part 4)	15

Doctor of Business Administration (DBA)

Studying for a DBA at UIC is a vibrant and lively experience, with our wide-ranging international links and commitment to professional practice. The high

quality of research and teaching at UIC and its associated institutions has been widely acknowledged externally.

The DBA is an online program aimed at outstanding managers, who hold a master's degree or equivalent, or have many years of managerial experience and want to enhance their professional practice combining academic rigor and managerial relevance. The goal is to contribute to the state of the art knowledge in their chosen area of study through management research within current and future work settings.

The Doctorate of Business Administration (DBA) is a part-time professional doctoral degree with an international scope and reputation, designed to enhance executive and professional practice through the application of sound theory and rigorous research into real and complex issues in business and management. It enhances the capability to develop knowledge and theory, and their application. Key to this is a program to develop personal, consultancy and research skills in the context of rigorous and relevant research.

The UIC DBA will enable you to:

1. Develop a sound understanding of the relevant conceptual and theoretical underpinnings of your chosen area of research into business and management
2. Have a detailed understanding of applicable techniques for research and advanced academic and management enquiry
3. Create and interpret knowledge through original research. Enhance both your performance as a reflective practitioner and your professional practice
4. Develop personal, consultancy and research competences to undertake rigorous research at an advanced level that contributes to theory and practice in business and management

DBA-900-4	DBA Dissertation (Part 4)	15

Doctor of Education (EdD)

The Doctorate of Education degree is aimed at experienced educational professionals and sets out to place you at the leading edge of your professional field in terms of knowledge, awareness and understanding.

The EdD is for those who are eager to make substantial and original contributions to the development of educational knowledge in a broad range of educational settings including K-12 schools, colleges, universities and governmental organizations.

Delivered through a blend of online interactions and real-world experiences, the EdD program allows students to continue working full time while pursuing a degree that will distinguish them as organizational leaders. Students will explore how learning occurs in formal and informal workplace settings, examine effective strategies for facilitating organizational learning, and learn to create systems that produce more effective, adaptable and competitive organizations.

The degree meets the need for the highest levels of professional development and training of both educators and those concerned with educational policy and administration. The prime focus is on the interplay between the multi-dimensional practices of education and scholarship.

The degree is designed to engage current practitioners with knowledge, awareness and understanding of the philosophical, organizational, political, social, managerial, interpersonal, and technical dimensions of schools and other educational institutions. Exploration of the nexus between theory and practice begins with a series of online modules that will develop you capability to perceive critical issues facing educators and policymakers today through the lens of contemporary and historical research and philosophy. This broad foundation will enable you to hone your specific interests towards the conduct of supervised research that will make an original contribution to your field.

Program features

- A high-level academic study of a range of educational and professional issues
- Four tutored units and a supervised research component
- Will enable you to make a contribution to knowledge through unit assignments, and through your dissertation

- Focus on the interplay and relationship between professional practice and scholarship.
